PROFESSIONAL PROFILE

Finance-trained Data & BI Analyst combining a degree in Financial and Economic Engineering with hands-on experience in operational reporting, KPI tracking and dashboard development. Skilled in turning raw financial and operational data into reliable, decision-ready reporting using Power BI, SQL, Python and Excel. Strong track record of automating recurring reports and improving data quality and governance.

KEY SKILLS

- Financial & operational data analysis, KPI/SLA tracking, variance and performance reporting
- Power BI dashboard design and development | Advanced Excel (VBA) | SQL | Python
- Data quality control, cleaning and governance | Process documentation
- Reporting automation (Power Automate) | Management reporting & steering committee support
- Project & production management support (MS Project, SAP)

PROFESSIONAL EXPERIENCE

Operational Steering & Reporting Assistant *April – July 2026 (3 months)*
YAZAKI Kenitra (YMOK)

- Prepared and automated operational performance reports for management and steering committees.
- Built 5+ Power BI dashboards to track KPIs and SLAs across production lines.
- Controlled, cleaned and maintained production databases to ensure reporting reliability.
- Monitored and analyzed performance indicators across multiple business lines.
- Documented reporting processes and supported data governance initiatives.
- Automated recurring reporting tasks using Excel and Power Automate, reducing manual processing time.
- Collaborated with operational managers to support day-to-day performance follow-up.

Administrative & Reporting Assistant *July – September 2024 (3 months)*
Délégation Provinciale de l'Industrie et du Commerce, Kenitra

- Produced periodic activity reports and tracked sector-level performance indicators.
- Consolidated and controlled the consistency of public data registers.
- Followed up on case files and activity indicators for the department.
- Prepared meeting materials and presentation support for management.
